

SYSTEMS INTEGRATION

As an Information Technology solutions provider focused on the communications industry, Trigon offers both the domain specific business knowledge and the technical expertise to provide fully integrated software solutions. Trigon's development and architectural strategies employ modern, next generation e-Business and Business to Business (B2B) technologies that combine the power of the Internet with client/server solutions, and integration with complex back-end Operational Support Systems (OSS).

SERVICE OVERVIEW

METHODOLOGY

Starting with the business problem, Trigon partners with clients to ensure a solid understanding of business and functional requirements, budget, and time-to-market pressures. Through collaboration on alternative technologies, Trigon partners with clients and vendors to determine the best combination of hardware, packaged software, and custom development to achieve the highest quality solution. Trigon uses proven rapid application development techniques to ensure delivery in a timely and cost-effective manner.

COMPLETE SOLUTIONS

Trigon provides comprehensive, scalable, integrated solutions that harness and exploit the power of the Internet. To achieve this, Trigon offers complete solution services for integration projects:

Program Management - ensuring that your initiatives are delivered on time, within budget, and are aligned to business objectives.

Architecture and Design - providing a comprehensive and complete solution to meet business needs.

Package Selection and Configuration - working with clients to evaluate and select the best solution, and then installing and configuring the selected package(s).

Software Development Services – specializing in enterprise class, scalable, web based solutions, Trigon develops the software needed to fill the gaps in the solution set as well to provide competitive advantage.

Integration Services - using leading edge Enterprise Application Integration (EAI) frameworks, Trigon integrates packages, custom solutions and legacy systems into a cohesive OSS.

TESTIMONIALS

"Trigon has proven to be an excellent partner in enabling us to deploy a world class OSS solution in record time. Trigon's expertise in system integration allowed a number of disparate applications to be brought together to form a cohesive end to end service management solution that is the envy of mature telecom companies."

Director, System Requirements,
Start-up DLEC

"Trigon was instrumental in providing architectural direction, and solutions design to key technical issues. This showed a depth of skill and expertise that was highly valuable and contributed greatly to the success of the project."

Senior Project Manager,
ILEC
